

# Agricultural Finance Resource Amplification

Project Title	Agricultural Finance Resource Amplification
Project Summary	This project will focus on curating agricultural finance materials on the Agrilinks website to become more accessible and searchable by the general public. Depending on the availability of the applicant and office needs, other technical projects in the sector can also be discussed.
Country	United States

## Project Description

This project will first focus on identifying all of the relevant agricultural finance materials on Agrilinks (and potentially key external resources). The intern will be expected to work with relevant contractors and technical specialists to come up with a plan for how the materials will be laid out and accessed. The intern will then work with the Agrilinks hosts to bring the page/corner/landing screen to life. The ultimate goal of the assignment is to create a "one-stop shop" for the materials on Agrilinks for the general public to access.

Depending on the outcomes of this assignment, and if there is time/interest, other technical assignments in the agricultural finance sector can be discussed and created.

## Required Skills or Interests

Skill(s)
Data analysis
Economic analysis
Research
Storytelling/blogging/vlogging
Website design
Writing

## Additional Information

This internship is most relevant for juniors or seniors pursuing undergraduate studies. He/she will be the only intern working on this assignment, but will work closely with the specialists in the Bureau for Food Security.

## Language Requirements

*None*
